DIRECTOR

Resubmitted: September 15, 2008

TO: Rebecca A. Humphries, Director

INFORMATION: Natural Resources Commission

SUBJECT: Spawning Closures (FO-204)

Authority:

The Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, authorizes the Director to provide for better protection and preservation of fish, game and birds.

Discussion and Background:

Recently, Fisheries Division Management Unit biologists were asked to review the current list of spawning closures. The goal of the exercise was to reaffirm the original rationale for the closures and remove any that were no longer necessary to protect local fisheries. A secondary benefit of the exercise was to simplify regulations by reducing the number of exceptions listed in the annual fishing guide.

After careful consideration by each Management Unit, the following spawning closures are recommended for removal: Birch Lake Pike Marsh (Antrim County), Garden Corners Barrow Pit (Delta County), Baldwin River (Lake County), Muskegon River (Mecosta County), Denton Creek (Roscommon County), and Thompson Creek (Schoolcraft County). There are two spawning closures with minor date changes. We recommend changing the ending date on the Lower Black River (Cheboygan County) from May 15 to May 14 and on Shuberts Creek (Presque Isle County) from May 31 to May 14. This will align both spawning closure ending dates in that area to May 14 along with several other closures on the list.
